

Help when you need it

From a single PC through to a complex network we can provide cover for a single incident or reactive 24x7 monitoring and assessment of your entire IT infrastructure

Who is it for?

Every type and size of organisation is now dependent on their IT investment to improve efficiency, reduce costs and increase customer service. Keeping this investment operational is key to success, but for many small and medium-sized organisations this can be costly and time consuming.

Five Rivers IT support services have been specifically designed for SMEs and corporate businesses and deliver a high-quality and cost-effective solution that can meet all your support needs.

Why do I need it?

Any organisation that utilises IT in its day-to-day operations needs to consider how it would cope if there was a problem with the technology. How would you identify the source of this problem and then quickly fix it to minimise downtime? Have you got the right skills and experience to carry out the job yourself or do you need to partner with a third party specialist?

Five Rivers IT Support Services have been designed to take care of all this for you. From a one-off incident fix for your PC or server through to a comprehensive support agreement with 24x7 remote monitoring and specialist advice, we have a support option that will meet any need.

“A comprehensive portfolio of support services designed to meet any business need”

Mr P Rose – OCBC

What is covered?

Whatever your IT support requirement we have a service that can meet your needs:

- ❖ **IT Support For PCs** – provides a single point of contact for all your PC issues and covers the installation of new hardware and software as well as help with virus/Spyware problems
- ❖ **IT Support For Servers** - provides a single point of contact for all your server issues and covers the installation and support of Microsoft Active Directory
- ❖ **IT Support Office Manager** – complete proactive solution that helps manage your entire IT infrastructure 24x7
- ❖ **IT Support for One-Off Incidents** – immediate high-quality and cost-effective support solution for single incidents that covers PCs, laptops and servers
